

Sky Map

HOW TO MAKE THE STAR WHEEL:

1. You'll need two sheets of paper: this sky map, and the outer sleeve.
2. Cut away the excess parts.
 - Sky map: Trim off gray parts. What remains is an 8-inch circle.
 - Outer sleeve: Trim the excess, being sure to keep the white rectangle at the bottom. Cut out the interior white oval.
3. Fold the outer sleeve's white rectangle back. This will be the holder for the sky map.
4. Staple the outer sleeve's rectangle to the front, at the short white lines on either side of the oval.
5. Insert the circular sky map into the holder
